PROFESSIONAL SUMMARY

High-achieving BE CSE Cybersecurity student with a 9.6 CGPA and hands-on experience in network security, cloud computing, and AI. Proven technical proficiency in Python and Java, combined with a strong background in organizing cybersecurity events. Seeking to leverage internship experience at Cisco and robust analytical skills to contribute to a security-focused professional team.

EDUCATION

Arunai Engineering College

Expected 2027

BE CSE Cybersecurity | CGPA: 9.6

TECHNICAL SKILLS

Programming:	Python, Java, C++, SQL
Cybersecurity:	Networking Basics, VAPT Basics, Cryptography, Cisco Packet Tracer
Cloud & Data:	Cloud Infrastructure, Data Analytics, Database Management (MySQL)
Soft Skills:	Team Collaboration, Effective Communication, Problem Solving

INTERNSHIPS

Networking Basics Intern

Cisco Academy

- Mastered fundamental networking concepts including OSI model, TCP/IP, and sub-netting.
- Configured routing and switching protocols using Cisco tools to ensure network efficiency.

Cloud Computing Intern

- Gained expertise in cloud architecture, deployment models, and resource management.
- Implemented security protocols within virtual environments to protect data integrity.

Data Analytics Intern

- Applied statistical methods to interpret complex datasets and visualize security trends.
- Supported data-driven decision-making processes for risk assessment.

ACADEMIC PROJECTS

Project 1: Secure Data Encryption System

- Designed and implemented a file encryption system using Java to secure sensitive information.
- Applied cryptographic algorithms to prevent unauthorized access and ensure data privacy.

Project 2: Network Traffic Analyzer

- Developed a Python script to monitor and analyze network traffic for potential security threats.
- Used packet inspection techniques to identify anomalies and improve network visibility.

EVENTS & WORKSHOPS

Event Organizer – Capture The Flag (CTF)

Successfully organized and managed a college-level CTF competition, facilitating challenges in web security and forensics for student participants.

Workshop: Artificial Intelligence

Completed comprehensive training on AI applications in modern technology and threat detection.

Placement Course & Training

Attended professional placement courses focused on aptitude, soft skills, and technical interview preparation.
